

PANCREATIC CANCER

Improving Diagnosis, Treatment and Care

Copenhagen
4 September 2020

Welcome to the First Nordic Symposium!

SAVE THE DATE

Welcome to the First Nordic Symposium!

Pancreatic cancer is one of the world's deadliest cancers with a five-year survival rate in the single digits. The time is now to join forces in the Scandinavian countries to improve the care for patients with pancreatic cancer by sharing state-of-the-art knowledge in early detection and diagnosis, treatment and palliative care.

We want to gather staff from different specialties involved in the treatment of pancreatic cancer such as pathology, molecular biology, radiology and clinical physiology, oncology, surgery, gastroenterology, endoscopy, and palliative care.

We are delighted that internationally recognized key persons have accepted our invitation to come and share recent knowledge about pancreatic cancer.

Venue

Herlev Hospital
Borgmester Ib Juuls Vej 1
2730 Herlev
Denmark
